INTERIOR LININGS

Your guide to interior linings

YOUR DESTINATION FOR INTERIOR LININGS

Interior wall and ceiling linings create the backdrop for your space to which finishes, furniture and textiles are added to create an overall design style and aesthetic. They can act as a blank canvas or create feature, character and interest.

Here at PlaceMakers we have a comprehensive range of quality wall and ceiling linings that are suitable for various applications in both residential and commercial environments. We can help you get the most out of your space from creating warmth, scale or texture to selecting durable, low maintenance products.

THE GROUND RULES

Before you start any project, be sure the finished job will comply with the New Zealand Building Code and council regulations. For full information, consult your local council.

Front cover photo shows San Selmo Reclaimed in Reclaimed Original IMAGE COURTESY OF THE BRICKERY

Image shown features Laminex — Seratone Aqua in Herringbone

Manufacturers and Suppliers product and warranty information is also included in summary form in this catalogue. Please see Suppliers websites for further product warranty and performance information including installation and maintenance instructions.

ICONS KEY

PRE-FINISHED

Indicates that the product is supplied pre-coloured with a protective coating, ready to be installed with no sanding or painting required.

SUITABLE UNDER UV EXPOSURE

Indicates that the product has been tested to perform under the high New Zealand UV levels.

LOW MAINTENANCE

Indicates that the product does not require regular re-painting or re-sanding and is easy to clean.

SUITABLE AS A CEILING LINING

Indicates that the product is suitable to be used as an interior ceiling lining.

SUITABLE FOR WET AREA USE

Indicates the product is suitable for interior wet applications like bathroom panelling, kitchen splashbacks and laundry walls.

SUITABLE AS A SPLASHBACK

Indicates the product is suitable for use as a kitchen or laundry splashback.

MADE IN NEW ZEALAND

Indicates that the product is manufactured in New Zealand.

LIGHTWEIGHT

Indicates that the product is lightweight.

EASY TO INSTALL

Indicates that the product can be installed quickly and efficiently by a qualified tradesperson.

WATER RESISTANT

Indicates the product is water resistant.

SUITABLE AS EXTERIOR CLADDING

Indicates that the product is suitable to be used as an exterior cladding.

ANTIMICROBIAL

Indicates that the product has an antimicrobial coating that inhibits the growth of microorganisms.

SCRATCH RESISTANT

Indicates that the product is not easily damaged by scratching.

IMPACT RESISTANT

Indicates that the product is not easily damaged by impact.

EASY TO CUT

Indicates that the product is easy to cut to the desired size/ length whilst on site (dust extraction is recommended to assist with the management of silica dust).

FSC

Only products identified with the FSC® logo on the page are FSC® certified. FSC® Chain of Custody is available upon request.

Image shown features
Forman Building Systems – Viroc

GIB® STANDARD AND WET AREA SYSTEMS

GIB® Standard Plasterboard:

Made in New Zealand since 1927 GIB® Standard Plasterboard is a high quality, cost effective interior wall and ceiling lining. GIB® Standard Plasterboard provides excellent uniformity to help achieve a consistent quality finish throughout the building.

- Flat and uniform surface for a consistent, high quality finish
- Robust, fibreglass reinforced composite core for strength and flexibility
- Easy screw bedding for quick installation
- Strong and rigid with low sag for easy sheet lifting and flat ceilings
- 1350mm wide options for less sheet joins in high stud buildings

GIB® Wet Area Systems:

Wet areas such as bathrooms, laundries and kitchens are more vulnerable to the effects of steam and moisture. GIB Aqualine® with its moisture resistant core helps prevent moisture being absorbed through to the framing where it can cause real damage.

- Contains moisture resistant polymers to help prevent moisture penetration
- Robust, fibreglass reinforced composite core for strength and flexibility
- Easy screw bedding for quick installation
- Strong and rigid with low sag for easy sheet lifting and flat ceilings
- 1350mm wide options for less sheet joins in high stud buildings

APPLICATIONS: Interior wall and ceiling linings

SIZING: 2400, 2700, 3000, 3300, 3600, 4200, 4800 & 6000 × 1200 × 10mm, 2400, 2700, 3000, 3300, 3600, 4200, 4800 & 6000 × 1200 × 13mm

GIB® NOISE AND FIRE CONTROL SYSTEMS

GIB Noise Control® Systems:

A combination of products and building practices to reduce sound transmission between rooms and floors. GIB Noiseline®/ Braceline® plasterboard with its extra dense core helps make it more efficient at helping block out unwanted noise.

- High performance plasterboard designed specifically for reducing the level of sound transmission between rooms
- Its higher density core can reduce noise transmission between rooms and also between floors in two storey homes
- Other benefits of this product are its 30 and 60 minute fire ratings when used in fire systems and its increased strength and stiffness gives a more solid wall or ceiling

GIB® Fire Rated Systems:

Provides comprehensive guidance to help achieve fire protection for walls, floor/ceilings, and structural steel. GIB Fyreline® plasterboard includes a high density, modified core to resist exposure to fire longer than standard plasterboard.

- Contains a high density, modified core to resist exposure to fire longer than standard plasterboard
- GIB® Fire Rated Systems provide 30 minute to 4 hour fire protection

APPLICATIONS: Interior wall and ceiling linings

SIZING:

2400, 2700, 3000, 3600 & 4800 × 1200 × 10mm,

JAMES HARDIE VILLABOARD™ LINING

Whether your home is full of energetic kids or sees a lot of weekend entertaining, Villaboard™ Lining is a substrate that resists damage from moisture and impact.

Villaboard™ Lining is a high performance fibre cement board that creates a seamless flat surface which can be painted, wallpapered or tiled to provide a variety of looks.

It's exceptionally strong and ideal for use under tiles and offers you high impact resistance on its own too. Villaboard™ Lining is also suitable for wherever major impact resistance is needed, such as high-traffic hallways and garages.

- Durable internal lining suitable for wet areas such as bathrooms and laundries
- Creates suitable surface for tiles, paint or wallpaper
- Up to 60 minute fire resistance rating (FRR) can be achieved as per the Fire and Acoustic Design Manual by James Hardie
- Long edges recessed for easy flush-jointing
- Reliable impact resistant lining. Ideal for wall lining in applications where walls are prone to damage
- Suitable for both commercial and residential internal uses
- Resistant to fire, rot resistant and resistant to moisture damage
- Can be cut to size easily with the Hardie™ Knife, minimising dust on site
- Classified as non-combustible material

APPLICATIONS: Suitable as an interior wall lining in bathrooms, laundries and kitchens or high impact areas such as hallways, garages and rumpus rooms or externally on eaves and soffits

SIZING: 2 edge recessed: 2400×1200×6mm, 3000×1200×6mm, 2400×1200×9mm, 2700×1200×9mm, 3000×1200×9mm, Square edge: 2400×1200×6mm, 3000×1200×6mm, 2400×1200×9mm, 3000×1200×9mm

HARDIE™ GROOVE LINING BY JAMES HARDIE

Hardie™ Groove Lining lets you add a unique tongue and groove look to your walls and ceilings. Made of tough fibre cement board, it adds durability as well as timeless charm. It's a flat sheet that has vertical V-shaped grooves carved into its face. It is sanded smooth and can be painted any colour you choose to create the traditional look of tongue and groove panels.

- Resistant to fire, rot resistant and resistant to moisture damage
- Easy and fast to install, paint and stain
- Can be cut to size easily with the Hardie™ Knife, minimising dust on site
- Sheets have a half groove lengthways along the edge to provide concealed joints
- Outstanding impact resistance, making it ideal where walls are prone to damage
- Can be painted any colour, even darker shades
- Classified as non-combustible material
- Low maintenance

APPLICATIONS: Suitable for semi-wet areas such as bathrooms, kitchens and laundries, interior wall or ceiling linings and externally on eaves and soffits

ABODO VULCAN PANELLING

Created from thermally modified NZ plantation timber, Abodo's Vulcan Panelling is a lightweight, stable sarking timber with excellent thermal characteristics. Create a feature timber ceiling or wall with the rich warmth and distinctive straight grain of Vulcan Panelling.

- Naturally durable, and contains no wood preservatives – just as nature intended
- Natural stability – Vulcan Panelling is manufactured with a vertical grain orientation, which means the timber has great stability, even in harsh conditions
- Forest Stewardship Council® (FSC®) Certified – a guarantee that forest products come from responsibly managed sources, including forest management and chain of custody
- Declare certified Red List Free by the Living Futures Institute, the leading label in transparency for building products
- Free from Red List chemicals as required by the Living Building Challenge

APPLICATIONS: Soffits and interior wall and ceiling panelling

SIZING: TG9: 135×10mm, Smooth & V Groove: 175×10mm

FORMAN BUILDING SYSTEMS VIROC

Viroc is a cement bonded particle board (CBPB) that combines the flexibility of pine wood particles with the strength and durability of cement. With the look of real concrete panels, it's the smart way to ensure interior walls make a statement in contemporary homes, hotels, restaurants, foyers and commercial fit-outs. Take your pick of textures, with the choice of a polished, raw or sanded finish in different colours. Select contrasting shades or juxtaposition concrete-look panels with other materials for elegant effect. Go understated or choose to stand out: Viroc makes it all possible.

APPLICATIONS: Interior wall and ceiling linings and exterior wall cladding

SIZING: Black Raw and Grey Polished: 3000×1250×8mm, Red Polished, White Polished and Ochre Polished: 3000×1250×12mm

FINISHING TOUCHES

We supply a vast range of products to add the finishing touches to your walls.

The two key products covered in this section are mouldings and paint. Your walls will set the backdrop for your furniture and soft furnishings. A little extra money spent here is minimal in the overall cost of a build or renovation and will heighten the look, feel and perceived quality of the property.

PLEASE NOTE

When choosing interior linings for your project it is your responsibility to ensure that you receive sign off from the local authorities to ensure that the product you choose is suitable. PlaceMakers excludes all liability and responsibility of the specification or application of the interior lining.

As such the information in this catalogue is intended to provide general assistance to those interested in projects where wall or ceiling linings are required. Whilst care has been taken in providing the advice and recommendations in this catalogue, PlaceMakers takes no responsibility for the accuracy or completeness of it. PlaceMakers excludes all liability in relation to the statements and information provided in this catalogue and for any actions taken in reliance on this information.

Products featured in this catalogue may not be stocked in all stores but can easily be ordered in for you. Selected products may be an indent only order process which require a minimum eight-week lead time. Please note the colour, texture and finish of these products may differ slightly from that pictured. All photographic images are intended to provide a general impression only and we recommend you view a sample in store. As some photographs are sourced from overseas they may not reflect compliance with the NZBC in their application and as such should not be relied on. Please seek expert advice from your architect and relevant local authority.

Manufacturers and Suppliers product and warranty information is also included in summary form in this catalogue. Please see Suppliers websites for further product warranty and performance information including installation and maintenance instructions.
