

## Skill standard assessment schedule

### 40549 – Identify BCATS trades involved in the construction of a residential building (3 credits)

BCATS trades refer to any building, construction, or allied trades relevant to the construction of a residential building (i.e. architectural aluminium joinery, brick and block laying, carpentry, concrete, exterior plastering, flooring, frame and truss, glass and glazing, interior systems, joinery, kitchen and bathroom design, painting and decorating, resin flooring, roofing, stonemasonry, tiling).

The schedule below shows learning outcomes, the evidence required for assessment criteria in the skill standard, guidance for the teacher, and judgement statements.

**Note:** Teacher observations and comments made in the assessment resource serve as key evidence requirements for each skill standard. All guidance below is intended to support the teacher's observations/comments.

Learning outcome	Evidence required	Teacher guidance (to be used in accordance with commentary in the Programme Guidance document)	Judgement statement
Identify BCATS trades involved in the construction of a residential building.	Summary of different BCATS trades required to build a house.	<p>Summary needs to cover the four main stages of a house build (foundations, putting up the structure, making sure it is weathertight, finishing).</p> <p>The main trades required for each stage must be identified, along with the work they need to carry out, the order in which they are required, and their interdependencies.</p> <p>The summary should include a range of BCATS trades.</p>	<p>Evidence must meet the minimum of Achieved criteria as outlined in the BCATS Programme Guidance document – SS 40549.</p> <p>Comments related to the award of higher grades must reflect commentary in the Programme Guidance.</p>
