Level 1

3 credits

Skill Standard 40549 (v1)

Identify BCATS trades involved in the construction of a residential building

Learner name: _____

BCATS project: _____

BCITO
He Hunga Hanga Mātou
building people

Assessment: BCATS trades

Learner instructions

This assessment is about identifying BCATS trades required to build a residential building (e.g. a house).

You need to show you can create a comprehensive summary of the different trades involved, their roles, sequence, and how they can have an impact on each other.

You will need to provide the following evidence to support this. Submit it using myBCITO or the process at your school/organisation.

A copy of your summary.

It is a good idea to use the assessment checklist in this resource to keep track of the evidence you have collected.

The grade you are awarded will be based on your ability to thoroughly describe the different BCATS trades required to build a residential building.

Create a summary of BCATS trades required to build a house

The construction of a residential building involves four main stages.

- Foundations.
- Putting up the structure.
- Making sure it is weathertight.
- Finishing.

For this assessment activity, you need to create a summary of the different BCATS trades that contribute to the four stages above. You will need to include all of the following.

- The work each trade would do (e.g. the painter provides finishing to the interior and protection of areas while it dries).
- The order in which each trade comes in to do their work and how they can have an impact on each other (e.g. the plasterer prepares the internal walls before the painter comes in; if this takes longer than expected, it pushes out the completion date for the build).

You should present your summary in a format as agreed with your teacher.

Provide a copy of your summary as evidence.

Assessment checklist: BCATS trades

To be completed by the learner and the teacher.

Assessment activity	Evidence needed	Date all evidence collected (Learner to complete)	Teacher sign-off
Create a summary of BCATS trades required to build a house	Copy of your summary.		

Teacher observation: BCATS trades

Teacher instructions

Below are criteria for the available grades.

Not Achieved	Achieved	Merit	Excellence
BCATS trades involved in the construction of a residential building are not appropriately identified.	Identify BCATS trades involved in the construction of a residential building.	Effectively identify BCATS trades involved in the construction of a residential building.	Comprehensively identify BCATS trades involved in the construction of a residential building.

Provide comments on the learner's ability to meet the following assessment criteria.

BCATS trades required to construct a residential building are identified.	
Contributions of each trade to the main stages of construction are described.	

Grade awarded: BCATS trades

Teacher instructions

After considering all the evidence collected, enter the grade you will award for Skill Standard 40549, with comments that explain your decision.
